

Proficiency Based Grading in Mathematics

Are you ready to let go of the stacks of homework waiting to be graded?

Do you want to increase student learning?

Would you like to have more meaningful grades that communicate student knowledge?

Are you ready to create assessments linked directly to the Common Core State Standards?

Workshop Description

In this workshop, math teachers and instructional coaches will learn strategies to communicate with our primary client (the student), to encourage growth and to motivate learning. Teachers will be introduced to adjustment strategies and ideas on how to assess students in a proficiency-based model using the Common Core State Standards of Mathematics (CCSSM).

Teachers will leave with activities and planning strategies that can be immediately implemented in their classrooms, no matter what set of content standards they are currently teaching under.

To Bring: Participants should bring their text or material for a unit as well as the assessment(s) used for that unit.

Instructors:

Cass Thonstad, Newberg High School Teacher
Shannon McCaw, Math Consultant

Workshop Information

Location: George Fox University
Portland Campus Room 155
